Last updated: February 14, 2018

EDUCATION

- May 2014  Ph.D., "Small Satellite Passive Magnetic Attitude Control," Aerospace Engineering Sciences, University of Colorado at Boulder (Advisor Dr. Scott Palo)
- Dec. 2011  M.S. in Aerospace Engineering Sciences, University of Colorado at Boulder (Advisor Dr. Scott Palo)
- May 2008  B.S. in Aerospace Engineering, Virginia Polytechnic Institute and State University (Summa Cum Laude)

WORK EXPERIENCE

- 8/2017 –  **Planetary Resources**, Redmond, Washington
Principal Systems Engineer
Developed systems engineering process while leading the system engineering effort for a set of deep-space probes to explore resource availability on near-earth asteroids.
- Lead Systems Engineer for a commercial asteroid resource exploration mission
 - Established processes for requirements & technical resource management
 - Trajectory analysis for target selection (cruise & proximity operations)
 - Developed and defended mission Concept of Operations
 - Created, maintained, and enforced a project documentation plan
 - Guided project teams through requirements and technical resource analysis
 - Other work
 - Mission design / proposal for low-cost Enceladus life-detection mission
 - Launch and Early Operations Phase (LEOP) development for Arkyd-6 6U CubeSat
- 10/2016 –  **Planetary Resources**, Redmond, Washington
8/2017 *Systems Engineer*
- 3/2014 –  **GomSpace**, Aalborg, Denmark
4/2016 *Systems Engineer*
Technical leadership for three nanosatellite missions at various project phases.
- Lead Systems Engineer for GOMX-3, the first ESA In-Orbit Demonstration CubeSat
 - Carried design from statement of work to in-orbit commissioning review
 - Developed and maintained requirements, budgets, technical analysis, etc.
 - Defended design by leading multiple reviews with ESA mgmt. & contractors
 - Led integration, testing, and operation of EM & FM satellite models
 - Satellite was complete success; operated until de-orbit after >1 year in LEO
 - Lead Systems Engineer for SEAM, an FP7-funded scientific CubeSat
 - Carried design from statement of work through EM integration & test
 - Worked between 8 international companies to develop coherent design
 - Lead Systems Engineer for GOMX-4A/B mission, sister ESA / Danish 6U CubeSats
 - Carried design from Statement of Work through PDR
 - Adapted 3rd party prop. module to in-development internal 6U platform
 - Mentored student intern in system engineering role over 6 month period

8/2009 –
1/2014**University of Colorado**, Boulder, Colorado
Systems Engineer

Led 60+ students through the creation and operation of a 3 kg satellite for space weather investigation. The satellite surpassed all mission goals and made science measurements for 438 days, nearly 5× the full mission success duration.

- Developed and maintained requirements, technical budgets, and risk analysis
- Designed & implemented Passive Magnetic Attitude Control system for CubeSat
- Planned & executed integration and system testing incl. day-in-the-life, calibration, TVAC, and vibe
- Design & implemented autonomous commanding system for UHF ground station
- Designed an Extended Kalman Filter for attitude determination of a PMAC satellite
- Oversaw ground ops and performed anomaly analysis & correction

PROFESSIONAL SERVICE

2017 – Advisor to the first Guatemalan satellite university team
 Aug 2017 Judge for AAS/AIAA Astrodynamics Specialist Conference Student Competition
 June 2017 Reviewer for University of Washington's DUBSAT-1 CubeSat PDR
 2016 Reviewer for IEEE Transactions on Aerospace and Electronic Systems
 2011 – 2013 AP Calculus Tutoring
 2007 – 2008 Vice President, Sigma Gamma Tau Aerospace Honor Society at Virginia Tech
